VoiceBridge AI

Your Personal Multilingual Interview Practice Coach

1. Project Overview

VoiceBridge AI is a multilingual interview practice platform designed to help students and job seekers improve their interview communication skills and build confidence. It allows users to practise answering interview questions through voice recordings in Tamil and Indian English. The platform uses Gnani's Speech-to-Text API to convert spoken answers into editable text.

2. Problem Statement

Many students and fresh graduates struggle with interview preparation due to a lack of speaking practice, confidence, and opportunities to review their answers. Language barriers and limited access to personalised practice tools make interview preparation more challenging.

3. Proposed Solution

VoiceBridge AI provides an interactive platform where users can select interview questions, record their answers, convert speech into text, review their responses, and track their practice history. It makes interview preparation more accessible through multilingual voice-based practice.

4. Key Features

- Voice-Based Practice: Record spoken answers to interview questions.
- Multilingual Support: Practise in Tamil and Indian English.
- Speech-to-Text Conversion: Convert voice recordings into text using Gnani Vachana API.
- Interview Question Bank: Practise HR, technical, behavioural, and project-based questions.
- Transcript Review: Edit, copy, and download transcribed answers.
- Practice History: Maintain a record of previous practice sessions.
- Answer Improvement: Review responses and identify areas for improvement.

5. Technology Stack

- Frontend: React.js, Vite, HTML, CSS, JavaScript
- Backend: Node.js, Express.js
- AI Integration: Gnani Vachana Speech-to-Text API
- Audio Processing: Browser MediaRecorder API, FFmpeg

6. Target Users

College students, fresh graduates, job seekers, and individuals preparing for campus placements and job interviews.

7. Expected Impact

VoiceBridge AI aims to improve interview readiness, communication confidence, and accessibility to interview practice. By supporting Tamil and Indian English, it helps users practise in a comfortable language before facing real-world interviews.

8. Future Enhancements

- AI-powered personalised interview feedback and answer evaluation.
- Support for additional Indian languages.
- Advanced performance analytics and personalised practice recommendations.

Project Title: VoiceBridge AI
